

ALESSANDRO SALVATORE BATTIATO

Full-Stack Web Developer with a strong **front-end** background, and over **3 years** of professional experience building and maintaining **SEO** friendly web applications using **React**, **Next.js**, and **TypeScript**.

My professional experience has been focused on front-end development in **product-driven** environments, working on **complex UI flows and real-time features**. In parallel, I am actively transitioning into full-stack development through personal projects using **Node.js** and **PostgreSQL**, most recently building an **AI-powered chatbot**, handling the full web stack from user interface and authentication to message handling and data persistence.

I bring a strong product mindset, attention to code quality, and proven experience working in **Scrum teams**, collaborating closely with designers, product managers, and developers to deliver well-structured and maintainable features.

SKILLS

- TypeScript
- React.js
- Next.js (Pages Router & App Router)
- React Three Fiber
- Node.js
- Express.js
- Redux Toolkit & RTK Query
- Tailwind CSS

WORK HISTORY

FRONT-END WEB DEVELOPER

CreationDose | Catania, Sicily

MAY 2023 - CURRENT

Product & User Experience

- Built and maintained multiple web applications using **React.js**, **Next.js**, **Tailwind CSS**, and **TypeScript**, delivering performant and accessible UIs based on **Figma** design handoffs.
- Developed complex front-end flows, including **autosaving** drafts, **debounced** field updates, and **Stripe** powered checkout flows.

Code Quality & UI Architecture

- Contributed to migrating the main codebase from **JavaScript** to **TypeScript**, improving code quality, maintainability, and developer experience.
- Developed reusable and animated UI components using **Framer Motion** and **GSAP**, documenting them in **Storybook** for testing and development.

Real-Time & Platform Integrations

- Built the front-end of a real-time chat system using **Socket.IO**, supporting messaging, file uploads, and media moderation in close collaboration with backend developers.
- Maintained an admin panel with **React Admin**, supporting content validation, approval flows, and structured data management with **React Hook Form**.

CMS & Content Integration

- React Hook Form
- RESTful API integration
- PostgreSQL
- GitLab CI/CD

EDUCATION

JUL 2020

High School Diploma

Liceo Regina Elena | Acireale, Italy

LANGUAGES

Italian

English

- Developed CMS driven content structures in **Strapi** v3 for dynamic landing pages with relational models.
- Delivered a production-ready front-end email signature generator with Strapi v4 and Next.js 13+.

Product Growth & Experimentation

- Implemented feature flags with **Unleash Proxy Client** for React to enable **A/B testing**, collect **KPI** insights, and support product improvements based on real user data.

Process & Collaboration

- Active contributor in a **Scrum** team with biweekly sprints, planning poker (**Fibonacci** based estimates), and retrospectives.
- Managed **CI/CD** related front-end tasks, environment configurations, and feature-specific testing environments.
- Followed a strict **Git** workflow with isolated feature branches, keeping the main branch reserved for production releases.
- Managed tasks and sprint planning using **Jira** and tracked time with **Clockify** to improve workload awareness.

Across three years of product development, I contributed to the evolution of a platform connecting brands and creators, supporting business growth through scalable front-end architectures, reliable user experiences, and continuous feature delivery.
